

Security Operations Centre (SOC)

In 2021, the cyber threats across the globe became more treacherous. Cybersecurity and privacy professionals are working together to proactively identify and manage digital disruption, regulatory upheaval, and enterprise threats that organisations face daily.

The average ransomware payment climbed to \$570,000 during the first half of 2021, up from \$312,000 in 2020.

1 What we offer

Managed security services to organisations to deal with security issues and emerging cyber threats in real-time.

2

How we help our customers

We help organisations to improve their ability to detect and respond to cyber threats in the new reality. We ensure our customers are well prepared for cyber threats, better manage the risks and vulnerabilities, safeguard the sensitive data, compliant with process safety, cyber standards, and regulations.

3

Why we are different

Our Cybersecurity team consists of highly trained and specialised consultants and professionals with experience helping businesses across industries assess, design, deploy and operate cybersecurity and privacy programs.
